Techo-agricultural Innovation for Poverty Alleviation – TIPA

A project based on the concept of the African Market Garden (AMG), and focusing on poverty reduction and crop productivity was established in Cradock in South Africa's Eastern Cape Province as a result of Israel's participation in the World Summit on Sustainable Development (WSSD) in Johannesburg in August 2002. Both TIPA and the African Market Garden are a specialized horticultural production systems for small landholders, making use of the Family Drip Irrigation System, developed by the International Program for Arid Lands (IPALAC), MASHAV's extension Center for International Agricultural Development (CINADCO) and Israeli irrigation manufacturer Netafim. The system, which includes a mix of annual and perennial crops and a special low-pressure drip irrigation system, has been proved to significantly enhance yields and lowers the risk of subsistence farmers in arid and semi-arid zones. After starting with 20 small-scale family drip irrigation systems for local farmers, that number expanded to 120 in 2003; another similar scheme has also been established in a nearby region. In 2004, MASHAV expanded the project to other areas of South Africa in cooperation with Ikamva Labantu, a local NGO, and the Embassy of Israel in Pretoria. The project is accompanied by a MASHAV long-term expert.
